finnCap reinvest in the Invantage suite

finnCap – a specialist small-cap financial advisor and broker – has reaffirmed their relationship with Investmaster through a re-implementation of their Back Office system, Invantage Settlement.

The investment, in both the system and their people, comes after finnCap decoupled their business from JM Finn in 2010 and gives them a fresh base upon which to pursue their aim of being 'the leading independent broker to growing companies, focused on delivering value through long term partnerships'.

The main drivers in the project were to ensure that the system is tailored to finnCap's needs and they are up-to-date with the latest functionality that is relevant to their business. finnCap can now ensure that their transactional (ledger) data remains accurate and understood by their staff.

Kean Williams, Head of Client Services at Investmaster says:

"We are delighted that finnCap is continuing their partnership with Investmaster by re-implementing their Settlement system. As this is our first real engagement with the new management team, the project has given us an opportunity to demonstrate the value that Investmaster and its systems can provide".

Notes to Editors:

About Investmaster:

Investmaster Group Limited has been providing IT solutions to the wealth management and institutional broking sectors for over 25 years. Investmaster has a well established client base with our clients' combined Assets Under Management exceeding £28 million.

Investmaster's Invantage suite is an integrated front, middle and back office system. The product functionality covers client management, reporting and the full trade lifecycle from front office decision support through to settlement, ensuring pre- and post-trade compliance and underpinning the clients' business in an increasingly regulated market.
