

Lewis Charles select Investmaster's InVantage solution

London, 30 April 2008. Lewis Charles Stockbrokers Ltd, a growing London broker, has selected Investmaster's InVantage solution in a move away from outsourced administration to in-house controlled processing and servicing

Lewis Charles commenced a review of the market in 2007 as part of its plan to bring in-house its administration operations during 2008. The rationale for this move is based predominantly on the company's accelerated growth, tighter control of their administration costs, and more control over its compliance activities.

Lewis Charles's selection criteria of potential suppliers was demanding in that any supplier should; be able to provide functionally rich solutions for Contact Management, Portfolio & CGT Management, Order Management, Settlement Administration, CREST connectivity; should have a strong track record and referencable clients; have experienced staff and have a spread and depth of knowledge within the supplier's staff.

Having reviewed potential suppliers Investmaster was selected as it met all of the above criteria, and additionally has a scalability to its solutions that other software houses in this space currently are missing.

Peter Little, Chief Executive of Investmaster comments; "This is yet another excellent client for Investmaster to add to its client base. Lewis Charles has a good track record in the market place and has an aggressive growth plan which Investmaster would like to help in achieving. Along with other new contracts and several impending new client mandates Investmaster is flourishing in 2008."

About Investmaster:

Investmaster Group limited has been providing IT Solutions to the financial sector for over 20 years. Investmaster has both an established client base and a substantially growing list of new name clients from both the Wealth Management and Investment Management sectors.

Investmaster's core Wealth Management proposition is the InVantage product suite which is an integrated front, middle and back office solution. The product functionality covers client management, reporting and full trade lifecycle from front office decision support through to settlement, ensuring pre- and post-trade compliance and underpinning the clients' business in an increasingly regulated market.

In addition to its core Wealth Management proposition Investmaster also owns Cadis a functionally rich Data Management tool for the in-house aggregation and cleansing of multiple data sources for use by up-stream solutions.
